DURA DECK

Cellular PVC Technology Combined With Rigid Vinyl

SIMPLICITY OF A COMPOSITE DECK

The DuraDECK is the only rigid vinyl deck that offers all the simplicity of a composite deck yet gives you the advantages of polyvinyl. DuraDECK delivers the simple beauty of a 6" wood grain composite deck with our proprietary cellular PVC coextrusion technology.

Installation is easy using conventional deck screws. No brackets, clips or any other complications to worry about. What's more, our seamless Tongue & Groove design eliminates all visible screw marks on the surface.

DuraDECK delivers the beauty and simplicity of a composite deck but with many more advantages found only in polyvinyl.

Top 5 Problems In Wood Decks That The DuraDECK Overcomes

WOOD DECK	DuraDECK
Will Rot & Mold	NEVER
Splinters & Silvers	NEVER
Attracts Termites & Insects	NEVER
Stains On Surface	NEVER
Paint Peels And Cracks	NEVER
Gets Hot Under The Sun	NEVER

- Low Maintenance and Easy To Clean.
- Slip Resistant Wood Grain Surface with Cellular PVC Technology.
- No Visible Screws or Nails Give A Clean Finished Look.
- Color Fast Poly Vinyl Will Not Fade.
- Backed With Our Lifetime Warranty For Years of Trouble Free Enjoyment.
- Lighter colors keeps DuraDECK cool to the touch under the hottest sun.

THE ADVANTAGES OF RIGID VINYL

DuraDECK is made of a rigid vinyl base with a cellular PVC capstock. Our proprietary cellular PVC capstock delivers a surface that has the soft look and feel of a wood surface. The rigid vinyl base delivers tremendous strength for wide spans up to 24" on center, allowing you to mount the deck right into existing wood joists.

Unlike composite decks, DuraDECK will not sag or warp under the hot sun. The brighter colors keep it cooler to the touch even under the hottest sun. And DuraDECK does not use wood fillers, saw dust or recycled plastic bags. Making it a very consistent deck with no batch to batch variations, eliminating many of the fading and color variation problems common in composite decks. Plus, like all vinyl, DuraDECK is fire resistant.

DuraDECK is the strongest and most reliable deck available today, giving you peace of mind and trust for a lifetime of guaranteed performance.

Simple Installation

Installation of the DuraDECK is simple. Just reference the deck to a starting line and screw in the deck along the deck lip (1) directly into existing wooden joists. Joists can be up to 24" on centers, it's no problem. Finish off the edges with the End cover (2). If stairs or framing are needed, we also offer various widths of Facia boards with a facia screw plug (3).

Matching Durable Railing System

Almost every deck needs a matching rail. DuraDECK has a complimentary railing system to go along with your DuraDECK. Our railing features a superior strength T-hand rail system.
