DuraMax Stronglasting™ Vinyl Sheds

In choosing a shed—whether for storage or any other use—the most important things to look for are **strength, durability, attractiveness, size, value for the money** and **low maintenance**. DuraMax vinyl sheds offer—by far—the best combination of these features. As the name suggests, DuraMax sheds are built to last. They will not rust, dent, rot, mildew or fade...and they **never need painting**. They have been wind-tested to 115 mph and are designed to handle at least 20 lbs per square foot of snow. Their attractive design and neutral ivory color go well anywhere.

- DuraMax Vinyl Sheds are Stronger than Ordinary Plastic Sheds
- DuraMax Sheds are Reinforced with Metal Inserted Columns for Even Greater Rigidity and Strength.
- Not Only Are They More Durable, They Will Look Better Over The Years to Come. They Will Not Fade, Rot, or Mildew Like Typical Painted Wood Sheds. And Unlike Metal (even vinyl coated metal), They Will Not Rust or Corrode.
- Vinyl Is Fire Retardant (Plastic Is Not)
- DuraMax Sheds Are Available in Larger Sizes Because Their Greater Strength Allows Less Bulky Construction, Making Larger Sizes Practical.
- Wide Double Door Entry for Equipment...Yet Tall Enough to Walk Right In

Optional Foundation Kit

Optional Window Kit
