ADOBE

DuraMAX has engineered the perfect substitutes for wood fencing: DuraWood and DuraGrain. Made of durable vinyl, our wood-like fences offer an amazing “real wood” texture and grain. By combining Poly Vinyl extrusions with molecular technology, we’ve created wood-like fences that provide high durability and low maintenance.

What Makes DuraMax Superior

DuraMax vinyl fencing was designed for and is manufactured in the Southwest. DuraMax has been manufacturing vinyl products in the Southwest for over two decades and has perfected its vinyl products to meet the demanding weather conditions of the region.

Proprietary DuraResin Material

Our proprietary DuraResin® vinyl is designed to withstand the Southwest sun, boasting over 12 parts of TiO2 and highly perfected UV inhibitors and modifiers. With DuraMax you can be sure you're getting the highest quality vinyl that is a permanent and durable fence solution.

"Route and Lock" Construction

DuraMax vinyl fencing is built by routing and interlocking the different fencing parts together. Routed and interlocked members will never pull apart or fail. Our "Route and Lock" construction ensures that your beautiful investment will last forever.

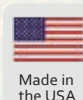

***DuraMax is
"The Most Durable Choice"
in Vinyl Fencing***

Go Green with DuraMax!

DuraMax Vinyl Building Products are 100% recyclable and reusable. They never need to end up in a landfill. In fact, we recycle over a million pounds of Poly Vinyl every year!

The USGBC found that Poly Vinyl performs better relative to environmental impact than alternative materials studied.
